RE: Docket Number E-01933A-12-0291

Dear Corporation Commission,

I'm writing to urge you to take up the energy efficiency plan for Tucson Electric Power as part of their proposed rate case.

As a business owner in the TEP service area, I'm greatly concerned with increasing costs. By reducing electricity demand, energy efficiency lessens electricity and fuel price increases and reduces customer vulnerability and exposure to price volatility. Energy efficiency does not rely on any fuel and is not subject to shortages of supply or increased prices for natural gas or other fuels.

It seems that energy efficiency is an ideal investment to make in Tucson to encourage a vibrant business community and to help them avoid cost increases and volatility.

Thank you for deliberating this issue. I trust you'll do what's right for the citizens of Tucson.

Regards,

Tim Bowden
